Software Licensing Information

For schools wishing to purchase their MLTI iBook G3 devices, the following describes the licensing status of the software that is included in the purchase;

With only a few exceptions, the titles included in the current MLTI 2005 image version 3.0 are licensed in perpetuity to the purchasing SAU. This includes the Macintosh operating system software version 10.2.8 and applications like Appleworks, iMovie, iPhoto, and iTunes. For a complete list of titles, versions and notes, please see below. Many titles are available in newer versions from their manufacturers than exist on the MLTI 2005 image. Upgrades to these newer versions are not included in the purchase of the MLTI device and are the responsibility of the SAU.

Licensing for the following titles is granted to the purchasing SAU with the following conditions:

1) **MacJournal** — Mariner Software has granted all schools purchasing MLTI devices license to continue to use MacJournal v3.0.2 for free from July 1, 2006 to June 30, 2007. After June 30, 2007, schools must agree to remove the software from the devices or pay for upgrades to the software. Upgrades are available from Mariner Software for 50% off of the normal educational pricing rate. Specific information related to upgrades will be published soon.

2) **DataStudio** — Pasco has granted use of it's DataStudio software on the iBook for as long as the iBook is used by a Maine school. If a device is sold or transferred to an individual or other entity other than a Maine school, the DataStudio software should be removed by the school.

3) **Norton Anti-virus** — The anti-virus software will continue to function, but it will no longer receive updated anti-virus definitions. SAUs may contact the manufacturer or other resellers directly to purchase anti-virus software definition subscriptions.

4) **WorldBook** — The WorldBook software will continue to function, but it will no longer receive updated content. To purchase new versions of WorldBook, SAUs may contact the manufacturer or other resellers directly.

MLTI 2005 version 3.0 Software

Software Title	Version	Notes
Address Book	3.0.3	1
Adobe Reader 7.0	7.0.0	2
AppleScript	1.9	1

iPhoto	2.0.1	1
iSync	1.5	1
iTunes	4.7.1	1
MLTI Backup Utility	n/a	7
MLTI Permission Slip	2.5	8

Software Notes:

1 Licensed and included with the Macintosh Operating System version 10.2.8 bundle.
2 Licensed as freeware. These titles are freely distributed by their manufacturers.
3 Licensed as shareware. These titles are freely distributed by their manufacturers. Some functionality is limited. SAUs may purchase full licenses for full functionality.
4 Licensed under the terms and conditions outlined above and detailed on the attached Memoranda (DataStudio and MacJournal).
5 Licensed under an Educational License. Manufacturer grants free use to educational institutions. If the device is transferred to an individual or entity for non-educational use, then the title should be removed by the SAU.
6 Licensed as freeware. This title is freely distributed by the manufacturer. The FirstClass client software may be used, but licensing for FirstClass accounts and server software are not included.
7 The MLTI Backup Utility will not function because the associated FirstClass account and hosted server will not be available. If the middlemaine.org system continues after the Apple MLTI contract expires, its accounts will be associated to the new MLTI devices and their users.
8 Licensed for use, but should only be used on the MLTI 2005 image as it is specifically designed for use on that software image. It will not function properly on other Macintosh computers and may cause unexpected problems and issues if used on non-MLTI imaged devices. Apple does not support or warranty the use of the MLTI Permission Slip program.
